

# LVT

## DESCRIPTION

The LVT is a tower add-on which creates a taller entry to your LV series home. LV add-on's are custom connections between LV series units, therefore you will need to engage our design staff to integrate the add-on's to your LV series home. This brochure contains specific information with respect to the LVT, but it does not contain general information that is shared amongst all the LV Series homes. You must supplement this brochure with: **LVS Design** and **LVS Build**.

**SQUARE FOOTAGE:** Approx. 218 sq. ft.  
**OVERALL DIMENSIONS:** 14'-9" x 14'-9"  
**TYP. CEILING HT. (Throughout):** 15'-9"

## LVT CONNECTION

Below is an example of how the LVT can connect with LV series homes. Connections vary depending on your site and needs; therefore, we will need to customize our construction sets to create your home. To learn more about customizations, read the **LVS Design** brochure.
